

Environmental Policy

Slogan: Environmental conservation and its continuity for future generations

Action Plan

1. Accord environmental conservation the highest priority in our business at the Kozaki Plant.
2. Incorporate environmental impact and prevent wastewater pollution through our design, development and manufacturing of fused cast refractories and related materials. (Incorporate environmental impact and reduce (minimize) wastewater through our design, development and manufacturing of fused cast refractories and related materials.)
3. Set environmental management targets (energy savings, waste reduction, reduced discharge of controlled chemical substances and recycling of resources), achievement of targets, and promotion of effective utilization of global resources.
4. Continually modify and improve environmental conservation schemes by enthusiastically implementing conservation measures.
5. Follow environmental laws and guidelines that we acknowledge, and attempt to prevent pollution through conservation.
6. Contribute to society by environmentally friendly design & development; improve the production process in a manner consistent with conservation activities.
7. Promote consciousness of environmental activities, and invest in scattering of materials, outflow and reduction of groundwater contamination in our facilities.
8. Promote beautification and greening activities at the Kozaki Plant in harmony with the natural environment, and work together with the regional community.
